

**Footnote:**

- 1. An employee falling in block A with company falling in block D will most probably not steal.**
- 2. An employee falling in block B with company falling in block C will most probably steal.**
- 3. However, an employee falling in block B and company in block D, present a lower risk of dishonesty – will be very difficult to steal/defraud.**
- 4. Employee in block A and company in block C might present a risk of dishonesty to the company in light of constant temptation and opportunities.**
